

UNITED STATES GOVERNMENT

Memorandum

TO : SAC

FROM : SA P. R. LANCASTER

SUBJECT: ASSASSINATION OF JOHN F. KENNEDY

DATE: 2-23-67

On 2-21-67 JOE LIPSEY, the vice-president of Wellan's Dept. Store in Alexandria, La. telephonically advised that after reading the recent articles in the paper about KENNEDY'S assassination and a possible tie in at New Orleans he wanted to give some vague and nebulous information:

At the time of the assassination LIPSEY had a friend who was a doctor at the Jackson Mental Hospital at Jackson, La. This doctor is VICTOR WEISS, JR. who now works in the Medical Arts Bldg., San Antonio, Texas. Allegedly this doctor told LIPSEY and other friends of a patient he had at the Jackson Mental Hospital who came in some time shortly after the assassination and said she was involved with a group of men in the assassination of KENNEDY.

LIPSEY noted this girl was a patient in a Mental hospital but thought perhaps he should pass this information along in view of recent newspaper articles from New Orleans.
